Thick, fleshy roots
(Susceptible to root rot and anaerobic respiration)
Perlite + Potting Soil
environments
Lacking in water storing tissue
(A little perlite just for good measure)
Vermiculite + Potting Soil
Vermiculite, perlite and potting soil
SEDUM!
OXYGEN LOVERS
Need large amounts of perlite and NO VERMICULITE
Have delicate and shallow root systems (require maximum macropores)
Horticultural Society
JOIN US!
Our mission is to support and educate fellow gardeners and encourage those new to gardening.
Membership Benefits
Gardening interests for all ages
Expert speakers
Flower shows & workshops
Huge plant sales
Discounts at garden centres
Social networking and more...

KEEPING ONTARIO BEAUTIFUL

Common indoor plant + what they like!

Succulents, Cacti, Monsteras, Philodendrons, Pothos, Snake Plants, Fiddle Leaf Fig

- *Dryer conditions*
- *High-oxygen environments*
- *Thick, fleshy roots*

(Susceptible to root rot and anaerobic respiration)

Perlite + Potting Soil!

Ferns, Calatheas, Peace Lilies (Mesophytes)

- Moisture-loving plants (tropicals)
- Highly damp/moist environments
- Lacking in water storing tissue

(A little perlite just for good measure)

Vermiculite + Potting Soil!

Spider plants, Chinese Evergreen, ZZ plants

- Dense root systems
- Requires a middle ground (dry + wet conditions)

Vermiculite, perlite and potting soil!

SEDUM!

- OXYGEN LOVERS
- Need large amounts of perlite and NO VERMICULITE
- Have delicate and shallow root systems (require maximum macropores)

GARDENS, OUR SENSES AND THE PURSUIT OF WELL-BEING

A PRACTICAL WORKSHOP FOR NOTICING MORE, MOVING GENTLY AND GROWING WELL

JVC

- Tamarack
- ~~Hackberry - CP has a park dedicated to [illegible]~~
- Pin cherry
- American hazelnut

Coniferous vs. Deciduous

Coniferous

- Also known as softwoods and evergreens
- Bears a needle-like or scale-like leaves
- Needle or scale-like leaves do not fall in autumn (except for larch)
- Bears a cone
- 14 native species in Ontario

Deciduous

- Also known as hardwoods and broadleaf trees
- Bears a leaf
- Leaves fall off the tree in the autumn
- Has a true flower
- 84 native species in Ontario

Hello Team, Volunteers and those who want to know...

We all have so much to be thankful for. One of those things is Carlo who has entertained and helped on this Seed to seedling quest.

He has built an air pruning box. Then Margaret came over and helped get the would and seeds in. We have planted 20 to 40 of the following:

- Bitternut hickory
- Pin Oak
- Alder
- Ginkgo biloba
- Burr oak
- Eastern Redbud
- Western Catalpa
- Black walnut

I had 3 volunteers bring seeds over to my place on Sunday and we planted these additional types of tree seeds. These included:

- Eastern Hemlock
- Some version of Alder (variety to be confirmed)
- Hackberry
- Red pine
- Pin cherry
- Eastern Hophornbeam that also goes under the name of ironwood
- Yellow birch
