KEEPING ONTARIO BEAUTIFUL™

2026 Top Trends In Landscaping

- A strong shift toward outdoor living, sustainability, wellness, and low-maintenance designs that blend functionality with beauty,
- Homeowners increasingly seeking spa-like or mindful elements: outdoor saunas, cold plunges, swim ponds, showers, meditation areas, or cozy seating nooks. These tie into broader wellness trends, creating restorative garden spaces.
- Water elements to add soothing sounds, visual interest, and wildlife support. Modern preferences lean toward low-maintenance or pondless designs. Fountainscapes, and decorative aquatic bowls.
